Professional Experience

10/2025 – 02/2026
Mühldorf am Inn, Germany

Workstudent - Project Management (Product Strategy)
ODU Automotive GmbH

- Planned and structured a strategic product project for high-voltage connectors in the e-truck segment including scope definition, milestone planning, and success criteria definition.
- Created phased work package structures with Gantt timeline planning, dependency analysis, and milestone tracking.
- Prepared and moderated cross-functional workshops for requirement alignment and decision making.
- Conducted market and competitive analyses and derived product positioning and management recommendations.

11/2024 – 05/2025
Stuttgart, Germany

Intern - Project Management HMI_SW & EE
Daimler Truck AG

- Tracked project progress, milestones, and risks using Jira and cplace to steer software and mechatronics subprojects.
- Created feature lists, use case descriptions, and technical documentation to align business and engineering teams.
- Moderated regular status meetings and ensured stakeholder alignment across multiple subprojects.
- Developed KPI dashboards and performed quality tracking to optimize processes including sprint and risk monitoring.

03/2022 – 08/2023
Pune, India

Backoffice Engineer - Sales Europe
Rieter AG

- Conducted customer requirement workshops and created customized quotation configurations for international machine projects.
- Coordinated internal project execution with production, planning, and logistics using SAP to align schedules and material availability.
- Maintained customer master data and communication documentation in SAP SD to ensure consistent information flow.
- Performed cost, margin, and change management analyses including quotation revisions, scope evaluations, and customer approval tracking.

06/2018 – 03/2022
Vadodara, India

Junior Service Engineer
Saurer GmbH

- Planned and controlled international machine installation projects using phased planning, milestones, and resource allocation with MS Project.
- Defined project scope, timelines, and responsibilities in alignment with customers, suppliers, and engineering teams.
- Coordinated cross-functional stakeholders to ensure timely installation and commissioning execution.
- Tracked risks, managed change requests, and maintained status reporting to ensure transparent project governance and milestone protection.

Education

10/2023 – present
Hof, Germany

Master of Business Administration (General Management)
Hochschule Hof, University of Applied Science
Study Focus: Project Management, Process and Information Management, communication and negotiation
Thesis: Carving Out Space for Hydrogen: Strategic Opportunities for Hydrogen-Powered Vehicles in an Electric Mobility World Using the Buyer Utility Map.

08/2014 – 05/2018
kolhapur, India

Bachelor Mechanical Engineering - Textile machines
Shivaji University
Study Focus: Mechanical Engineering, Textile Technology, Mechatronics, Electrical Engineering, Metallurgy, Industrial Engineering, Factory Planning & Management

Key Skills & Competencies:

Project management: Agile and classic project methods (waterfall, V-model), project structuring, schedule and milestone planning, risk management, dependency and resource control, project and product lifecycle management

Data analysis & research: Market and competition analyses, business and process analyses, benchmarking, KPI-based evaluations, decision support

Tools & Software Proficiency: MS Excel, PowerPoint, Word (expert level), MS Project, Jira, Confluence, cplace, Power BI, SAP SD/PP (basics), SQL (basics), Python (basics)

Collaboration & Communication: Cross-Functional Coordination, International Stakeholder Management, Structured Reporting, Executive Presentations, Workshop Facilitation

Projects

02/2026 – 02/2026

Product Compliance - Documentation automation
With AI support, designed and implemented a Python tool that automatically generates and outputs compliance documents (e.g., RoHS/REACH) from structured inputs; eliminates inconsistent results and significantly speeds up the time-consuming manual documentation process.

01/2026 – 02/2026

Application Tracking Automation
Developed an automated Python workflow tool that structurally captures application data, generates documents, and updates application tracking with a single click; reduced manual maintenance effort and increased process consistency.

11/2024 – 05/2025

Multi-Release Management
Designed and implemented an automated planning and reporting structure in cplace and Power BI for consolidated control of release milestones across multiple projects; increased transparency and enabled more informed prioritization and resource decisions.

11/2024 – 05/2025

cplace Optimization
Developed and introduced uniform data structures and reporting logic to centrally map status, risk, and progress overviews; reduced coordination efforts and improved traceability of dependencies.

01/2023 – 08/2023

Project coordinator - Kanban System design implementation.
Designed and implemented a Kanban system in Microsoft Teams Planner for structured management of sales and quotation tasks; increased productivity and workflow transparency within the team.
