Professional Experience

10/2025 – 02/2026
Mühldorf am Inn, Germany

Workstudent - Project Management (Product Strategy)
ODU Automotive GmbH

- Planned and developed the value proposition definition for a high-voltage connector in the e-truck segment including scope, objectives, and milestones.
- Supported decision-making through market and competitive analyses serving as input for make-or-buy and sourcing considerations.
- Facilitated cross-functional workshops to clarify technical requirements as input for material and supplier selection.
- Created standardized project and decision documentation to ensure traceable demand and sourcing foundations

11/2024 – 05/2025
Stuttgart, Germany

Intern - Project Management HMI_SW & EE
Daimler Truck AG

- Coordinated project progress, milestone, and risk tracking for software and mechatronics subprojects using cplace and Jira.
- Prepared detailed effort and cost breakdowns as a basis for supplier negotiations within project budgets.
- Coordinated change requests with cross-functional teams to evaluate cost and sourcing implications.
- Maintained structured project documentation (risks, milestones, changes) ensuring transparency of material and supplier impacts.

03/2022 – 08/2023
Pune, India

Backoffice Engineer - Sales Europe
Rieter AG

- Conducted customer requirement workshops and developed customized machine quotations ensuring technical feasibility.
- Monitored material availability, production order status, and delivery schedules in SAP to ensure on-time project supply.
- Coordinated between customers, production, logistics, and suppliers to align requirements, specifications, and delivery timelines.
- Performed cost, margin, and change impact analyses including cost recalculations and quotation revisions to support commercial sourcing decisions.

06/2018 – 03/2022
Vadodara, India

Junior Service Engineer
Saurer GmbH

- Planned and executed international machine installation projects including phase, milestone, and resource control.
- Coordinated with suppliers, engineering, and contractors to ensure timely availability of materials and equipment.
- Evaluated technical scope changes regarding feasibility and cost/schedule implications before implementation.
- Managed project risks, escalations, and corrective actions to ensure smooth delivery and installation execution.

Education

10/2023 – present
Hof, Germany

Master of Business Administration (General Management)
Hochschule Hof, University of Applied Science
Study Focus: Project Management, Process and Information Management, communication and negotiation

Thesis: Carving Out Space for Hydrogen: Strategic Opportunities for Hydrogen-Powered Vehicles in an Electric Mobility World Using the Buyer Utility Map.

08/2014 – 05/2018
kolhapur, India

Bachelor Mechanical Engineering - Textile machines
Shivaji University
Study Focus: Mechanical Engineering, Textile Technology, Mechatronics, Electrical Engineering, Metallurgy, Industrial Engineering, Factory Planning & Management

Key Skills & Competencies:

Project management: Agile and classic project methods (waterfall, V-model), project structuring, schedule and milestone planning, risk management, dependency and resource control, project and product lifecycle management

Data analysis & research: Market and competition analyses, business and process analyses, benchmarking, KPI-based evaluations, decision support

Tools & Software Proficiency: MS Excel, PowerPoint, Word (expert level), MS Project, Jira, Confluence, cplace, Power BI, SAP SD/PP (basics), SQL (basics), Python (basics)

Collaboration & Communication: Cross-Functional Coordination, International Stakeholder Management, Structured Reporting, Executive Presentations, Workshop Facilitation

Projects

02/2026 – 02/2026

Product Compliance - Documentation automation
With AI support, designed and implemented a Python tool that automatically generates and outputs compliance documents (e.g., RoHS/REACH) from structured inputs; eliminates inconsistent results and significantly speeds up the time-consuming manual documentation process.

01/2026 – 02/2026

Application Tracking Automation
Developed an automated Python workflow tool that structurally captures application data, generates documents, and updates application tracking with a single click; reduced manual maintenance effort and increased process consistency.

11/2024 – 05/2025

Multi-Release Management
Designed and implemented an automated planning and reporting structure in cplace and Power BI for consolidated control of release milestones across multiple projects; increased transparency and enabled more informed prioritization and resource decisions.

11/2024 – 05/2025

cplace Optimization
Developed and introduced uniform data structures and reporting logic to centrally map status, risk, and progress overviews; reduced coordination efforts and improved traceability of dependencies.

01/2023 – 08/2023

Project coordinator - Kanban System design implementation.
Designed and implemented a Kanban system in Microsoft Teams Planner for structured management of sales and quotation tasks; increased productivity and workflow transparency within the team.
